Please Note:

Open Air Fire Permit holders are required to notify the applicable Fire Department prior to igniting the Fire. At the time of burning, the permit must be in possession of the person in charge of the burning. The Fire must be attended to and under control of the person in charge at all times. A Fire permit does not allow for the burning of prohibited materials and will not excuse you from the requirement to abide by the Ministry of Environment laws and regulations. Fines and/or fees may be applied to any person that is believed to be non-complaint, careless, reckless and/or negligent in their responsibilities under the issued permit. Non-compliance will void the issued permit.
