Household hazardous and special waste materials are substances which may be harmful to people, animals and the environment if disposed of improperly. HHSW materials are not to be placed in the garbage or poured down the drain.

It is important to dispose of waste properly. Keeping hazardous materials out of landfill sites protects groundwater, conserves resources through recycling, and saves landfill site capacity.

Remember the **BUD** rule:

Buy only what you need

Use it all up

Dispose of what is left properly
