

NOTICE

RE: IMPROVEMENTS IN SERVICE 2013

Municipalities are required under the Municipal Act, 2001, Section 300 to provide notice to the public of:

- improvements in the efficiency and effectiveness of the delivery of services by the Municipality and its local Boards
- barriers identified by the Municipality and its local Boards to achieving improvements in the efficiency and effectiveness of the delivery of services by them.

Section 300 (2) the Municipal Act indicates that the Minister may designate the manner and form which notice shall be given under this section, however, to date, the Minister has not provided any direction. As such, we are hereby identifying that efficiencies and effectiveness in the delivery of services in the Township of Huron-Kinloss are included in the 2013 budget, particularly in the areas of Fire Services and road maintenance.

In preparing the 2013 Budget, the biggest factor faced which would allow us to achieve improvements in both the efficiency and effectiveness of the delivery of services was once again balancing rising operating costs and capital needs while maintaining affordability for our residents. Some other barriers we encountered included:

- aging assets
- increased operating expenditures and contractual obligations
